**He's Coming!**  
If you have tears, prepare to hide them; if you have cares, prepare to shed them; and if you have troubles, prepare to forget them, for Harold Lloyd is coming.

Harold—with his lenseless spectacles and ingratiating smile; his shy, appealing manner and wholesome, contagious humor—is coming to the Lyceum Friday and Saturday in his latest funfest, "For Heaven's Sake!" to make you laugh and chuckle and grin and guffaw and roar at his antics, adventures and thrilling experiences as a missionary in the slums of a big city.

Yes, Harold is a psalm singing salvationist in his new comedy opus—a mighty crusader, who comes to the conclusion that the underworld can stand a lot of uplifting. Just picture him trying to persuade the toughs and gangsters to trod the straight and narrow and slippery path and you'll have a faint idea of the uproarious action, the hysterical excitement and the delicious fun concentrated in "For Heaven's Sake!"

Of course, there's a girl at the bottom of Harold's strenuous soul-saving efforts—a lovely and lovable girl, charmingly personified by Jobyna Ralston, who furnishes the love interest so necessary to every well-balanced photoplay. Noah Young, James Mason and Paul Wiegel are others in the capable supporting cast. "For Heaven's Sake!" was especially written for Lloyd by Ted Wilde, John Grey and Clyde Bruckman. Sam Taylor directed.

**TEST 'O TEN**  
Only by constant exercising the mind can it remain keen and active. Without a stimulant it becomes stagnant. That's why we highly recommend this "Test 'O Ten" as being not only an amusing interesting pastime, but also a highly profitable one. The questions included have been compiled by one who has been asking questions for a long time—and one who knows what people know, what they want to know, and what they should know. What is your score for this week's test? Score ten for each correct answer.

- TEST 'O TEN QUESTIONS**
1. What country is known as "The Land of the Rising Sun?"
  2. What is the longest bridge in the world? What is its length? Where is it?
  3. How do kangaroos carry their young?
  4. What is the Binet-Simon Test?
  5. For what words do the initials, "E. G." stand?
  6. William and Evangeline Booth are identified with what organization?
  7. What is the oldest college in the United States? When was it founded?
  8. Who wrote "Peter Pan?" Who within the last few years starred in the motion picture production of that play?
  9. Who is Mack Sennett?
  10. What are the two great mountain ranges of the United States? The correct answers will be published next week.

- TEST 'O TEN ANSWERS**

Mother: "Did you give your penny to the Sunday School collection, Johnny?"  
Johnny: "No, Mother, I lost it."  
"What, lost another one? That makes three Sundays on which you've lost your pennies."  
"Yes, Mother, but that darned kid's luck can't last forever."  
"There is one word that will make me the happiest man in the world. Will you marry me?"  
Her: "No."  
His: "That's the word."  
Prisoner: "I'm sorry, your honor. I took the money, Judge. Well, you're getting seven years."

All those in neighboring rooms have perfect alibis.

"That son of yours certainly has got a will of his own."  
"Yes, that's why I'm cutting him out of mine."  
"I have always maintained," argued Mr. Newlywed, "that no two people on earth think alike."  
"You'll change your mind," said the wife, "when you look over our wedding presents."

**A cheap tube can cost you 10 times its price . . . . .**

**THIRTY-NINE YEARS** of tube-building experience has proved to Dunlop that "cheap tubes" do not pay.

That is why Dunlop tubes are made *casing shaped*. It costs a little more than to build them on a straight pole, as cheap tubes are built.

But a casing-shaped Dunlop tube is strong everywhere. The outside edge is not weakened by excess stretch. The side next to the rim has no wrinkles to crack with age and blow out. A Dunlop tube protects your casing, because it *fits*. And your casing is worth ten times the cost of the tube.

*We strongly recommend a Dunlop tube for every casing*
