CROSSING THE OCEAN. DEATH AND A TRIP TO EUROPE. NEWS FROM BOTH SIDES. PERHAPS WE COME BACK?

Written on the Aquitania on the way to Paris, by way of Cherbourg, leaving New York, just after midnight yesterday morning.

No matter how often you cross on big ships like this, or little ones, you are reminded that the long trip called death and an ocean voyage are not unlike.

You take your "last dinner" in New York, friends are more or less sorry to see you go. That's the death.

On board ship you sail through space for some thousands of miles, with only water all around you. That's the trip from here to the next world.

In due time you land in that next world, to find it different from this, and very interesting.

If you go to Paris—this writer is going there—you reach what many Americans consider a fairly good imitation of heaven.

The safety in crossing our little ocean, the certainty of landing on the other side, should make us worry less about the big crossing over the ocean of ether.

Once we knew as little about an Atlantic crossing as we know now about the "final trip" that each must take when his turn comes.

When Columbus started, they told him he would fall over the edge of the ocean.

When the Phoenicians, ancestors of many energetic Jewish citizens, first sailed from the Mediterranean, through the Straits of Gibraltar, past the gigantic rock and into the Atlantic Ocean friends thought that was the end of them.

Now crossing the ocean is like going from New York to Chicago. You hear from your friends on both sides of the ocean. Business messages come from the United States side, other messages from the European side; when 1,000 miles from shore.

Science has conquered this little ocean, intelligence has made it familiar, cleared out sea serpents, taught us we need not put wax in our ears to shut out the singing of sirens, convinced us, to our sorrow, that no mermaids are waiting to pick us up when we fall overboard. All fear and superstition are gone from these floating cities. A preacher on board does not worry the sailors—there are no sailors.

Our oceans and our land have been cleared of all superstitions, unreal horrors, chimeras, hydras and gorgons dire.

It has taken men all of the million years they have lived on earth to change from cave-men cannibals to modern exploiters of their fellow men and to get rid of earthly superstitions.

Many haven't done that yet.

Eventually we shall get rid of all the superstitions and look forward to death and the voyage that comes after it as calmly as we now prepare for a trip across the little Atlantic.

As people go to Paris and come back none the worse for the trip, and take up their activities again, many believe those that take the voyage of death come back from that trip to earth and take up their work about where they dropped it.

To them it seems reasonable to credit Eternal Justice with wise economy, and it would seem useless waste of time to send billions of imperfect creatures to work in another corner of the universe when the work here isn't finished.

We are only twelve thousand years from the late Stone Age, not two hundred years from the stage coach and sailboat.

A simple idea like putting the eye of a needle in the point instead of the thick end made the sewing machine possible and freed millions of women from slavery. We should believe that other ideas will free us from the slavery of superstition, which has driven us hard through the centuries and caused more brutality, fear, cruelty and murder than all other causes together.

Tennyson hoped there would be no moaning at the bar when he put out to sea, and wrote prettily about "Twilight and evening star." Typical mid-Victorian, that last trip worried him.

Earth's citizens of the year 10,000,000 may think as little about that "last" journey, feel as sure about it as a modern thinks and feels about his trip to Paris now.

THE hardest part of refinishing your floors is getting around to doing it. After that it's easy enough.

Just get a can of LAVA-VAR FLOOR FINISH and try it out. You'll be surprised at the results. And you'll be surprised at the way it stands the wear. It leaves a mirror-bright, waterproof surface, that won't turn white and won't show heel marks, etc.

We have just the brush you'll want to use, too. Stop in and see us. It won't obligate you in the least.

TIME not WORDS proves a tire's value

EVERY NEW TIRE LOOKS GOOD.

Dunlops not only look good, but they make good—over rocks and gravel, and ruts and sand.

Thirty-nine years of experience has shown Dunlop how to design a tread that gives maximum traction and slow, smooth wear.

This Dunlop tread is the toughest development of rubber known. And this same tough tread-rubber is carried clear around the sidewall to give maximum protection against rut wear.

You get the full benefit of all this extra tread-mileage because each Dunlop is built with the famous trouble-free cable-twist Dunlop carcass, to provide the high-strength and elasticity so vital to long tire life.

We recommend you put Dunlops on your car
