It PAYS TO ADVERTISE IN THE "NEWS"

FLORIDA FROGS ARE NOT HARD TO RAISE

Government Glad To Help Start Farm—Snakeproof Fence Is Needed.

A gentleman of Pensacola has recently received pamphlets from the Department of Agriculture on the raising of the large food bullfrog, according to the Pensacola News. It is the purpose of the gentleman shortly to start the culture of the frog on quite an extensive plan. It is also the intention of the gentleman to get a large collection of the best bullfrogs he can find and put them in a large marsh that is located near his place in Santa Rosa county, fencing the marsh in such a manner that snakes cannot get into it. It is thought by the gentleman that he can thus raise a large number of healthy bullfrogs for the market and make a good profit out of the business.

Of Monstrous Size.

"I have been living in Escambia and Santa Rosa counties for the last 10 years," he said, "and have noticed the multitude of bullfrogs that are in the fresh-water bodies in both counties. The frogs grow to monstrous size and seem to thrive in this section of the country. I think that a large and better grade of frog can be raised with proper care and I think that the raising of the frog will make a comfortable living for the man who engages in the business."

"I wrote to the Department of Agriculture some months ago inquiring as to the method of raising the frog, and have received a pamphlet giving me full directions. My intention is to fence in the marsh that is on my place and start a frog farm in it. I shall get all the snakes out of the place and keep it as clean as possible, so that the frogs will be healthy all times. I shall have the inclosure large enough to accommodate a large number of the croakers."

Market Good.

"I believe that there is an ample market for them in Pensacola, as all of the restaurants and hotels buy them whenever they can. The reason for the great scarcity of frogs at the present time is not that they are scarce but that they are rather difficult to catch. I am a firm believer in the work and shall set out with an eye to succeed. It seems to me that all a man has to have is a mudpuddle in his back yard and put some frogs in it, put a fence around it and feed the frogs. The climate is natural to them and they will thrive in spite of all efforts to exterminate them. A little attention a large, high-grade frog can be raised."

Weather Forecast For July—From Word and Works, by Rev. L. H. Hicks, we obtain the following regarding the weather for the coming month: "A regular storm period covers the 1st to the 6th of July. Certain wise critics inform us that it is safe to predict warm weather in July, so we will say that very high temperature will prevail from about the 2nd to the 5th, causing the country to pass eastwardly over the 4th promises rain and thunder storms for many localities. A reactionary storm period is central on the 8th, 9th and 10th. A regular storm period is central on the 14th, extending from the 12th to the 16th. A reactionary storm period is central on the 19th, 20th and 21st. A regular storm period is central on the 23rd, extending from the 21st to the 25th. It will not be surprising if threatening conditions last for several days before and after the 22nd. Heavy electrical storms and violent summer gusts are very probable about the 22nd, and from that date on through the period 24th to 28th.

Love Point to be Dumping Ground For Dredges. By authority of the Secretary of War, Major W. E. Craighill, of Baltimore, has designated new dumping grounds for mud and sand dredged from the bottom of Patuxent river and harbor. The old dumping grounds have been used for over 30 years. The new dumping grounds were authorized on Major Craighill's recommendations. Two areas were authorized, one being off Swan Point, on the Kent county shore of the bay and another off Love Point. The latter has been surveyed and buoyed and hereafter all material dug up from the bottom will be dumped there.

TO FILL PROFESSORS CHAIR. Principal Norma W. Cameron, of the Cecil County High School, has accepted the chair of Psychology in the West Chester, Pa., State Normal School, which has an attendance of upwards of 800 students, qualifying for teachers. We congratulate Prof. Cameron on the honor of this election, which his faithful study and devotion to his profession richly deserve. At the same time it is a matter for great regret that the public schools of Elkton should lose the services of one so experienced and capable in this line of work. Prof. Cameron is a Washington College graduate.

IN MEMORIAM. In loving remembrance of my dear husband and our father, JOHN G. LESTER who departed this life six years ago (June 1903). The last farewell was spoken six years ago to day. Our family circle broken. When my dear husband passed away, his loved ones were often we seem to be cheerless. We smile and they think we are gay. But alas we are full and gloomy. Because our dear father's away. HIS CHILDREN.
