CHIROPRACTIC NOT A NEW OR UNTRIED METHOD
Discovered in 1895 by D. D. Palmer of Davenport, Iowa, the Chiropractic has grown by leaps and bounds until today there is scarcely a community of any size without a Chiropractor, and the good word of Chiropractic is being spread to every corner of the earth.
The fact that in the past 19 or 22 years the great majority of the States of the Union have given legal recognition to Chiropractic proves that Chiropractic is advancing its merits alone. Chiropractic is well known in the large towns and cities, especially in the Western States. Numerous people in Kent county have had Chiropractic with good results but generally speak of Chiropractic as comparatively new in this section of the Shore.

LUMBER
Build Now--Lumber Prices Are Right
FROM the viewpoint of service to the community, we have found it necessary to acquaint the public with the facts concerning the price of lumber. Sensational stories have been circulated playing up the reported postponement of large building projects, because of cost of material and labor. On account of these exaggerated stories the average un-informed citizen gives credence to the statement that lumber prices are as high as they have been at any time. Naturally he figures, if lumber prices are at their peak, the logical course is for him to wait until they come down.
