MIGHTY ARCTURUS.

Instantly Consume the Earth. in length, but the calculation is reduced to the semidiameter of the orbit. The results are at the same time amaz.

Let us take the famous star Arc. turus, often called the "star of Job" because in the Old Testament the Almighty is represented as saying to the unfortunate patriarch, who maintains a certain dignity in spite of his helplessness and his sufferings. "Canst

thou call forth Arcturus and his sons?" Many conflicting measures of the parallax of Arcturus have been made. but the latest made at Yale seem more probably correct than their predecessors. They fix the parallax at 0.066 seconds—i. e., sixty-six one-thousandth of a second of arc. From this it is easy to calculate the distance of the star. It comes out at nearly 290,000,-000,000,000 miles (two hundred and ninety trillion miles). This is more the earth from the sun.

Having this distance, we can calculate the actual amount of light shed by Arcturus, or, in other words, its actual brightness as compared with that of our sun, on the supposition that both were at the same distance from us. We thus find that Arcturus exceeds the sun as a light giver about 2,500 times! It is a sun 2,500 times brighter than ours.

Put the earth as near to Arcturus as it is to the sun and all life would disappear from its surface as if swept off by a blast of inconceivable heat. The summer temperature would rise to tens of thousands of degrees. The oceans would boil away. Vegetation would be burned up in a twinkling. The eyes of living beings would char in their sockets. The plains and ing world nearer to Arcturus than about 4,000,000,000 miles. If he has 3 c planets he must keep them at a re-" spectful distance. And yet nearly 300.000,000,000,000 miles from him we can look into his blazing eye and see only a bright star.

Still, Dr. Alfred Russel Wallace maintains that this little earth, this tiny attendant of a tiny sun, is the only seat of intelligent life—outside of the misty midregion of disembodied spirits—that the universe contains, and Dr. Wallace is a learned man. But his learning is not that which astronomy offers.—Garrett P. Serviss in New York American.

Discrediting an Astrologer. A certain king, says a tale from the Persian, asked an astrologer, "How many years of life remain to me?" The wise man replied, "Ten." The king became very despondent and betook himself, as one stricken with a sickand in the king's presence asked him, "How many years have you to live?" He replied, "Twenty." The vizier ordered that he should that very hour be executed in the king's presence. The king was satisfied and mmended the sagacity of his minister and no longer Action at the astrol-

> Getting Into German. In the use of legal terms the German lawyer's gain in a saving of number of words over our equivalent expressions seems to be lost in multiplication of syllables in the words used by him. For example, he says "Zuruckbehaltungsrecht" for "right of lien" and "gesammtgutsverbindlichkeiten" for "liabilities of common property." What an awful word he must have as an equivalent for our "impre-
