GOOD CIDER.

Good cider can be made any where, of good fruit, by the following method:-When your apples are well ground, wet your straw with the juice instead of water, put some straw in a cask next your receiving tub, with a blanket on it, to filbe fit for bottling in four weeks. It should to their honor through future ages. not be removed in the cask it was put up in, but racked into another. If there be any who doubt this mode, let them try one cask after the above method. The aforegoing is certified from experience.
