District of the last of the la

[Extract from the report of the Centennial "This paint is quite different from paints in general use. * * Work which has been done with it, some of it exposed for years to the moist atmosphere of the sea-shore, establishes its great durability. * * * It is mixed ready for use, easily applied, of great beauty, and is economical."

[Extract from the report of the French (Centennial) Commission.] "It possesses merits unattainable by the old method of combining paint. * * * It can be applied with great facility and perfect regularity; dries with a rich, glossy surface, and will not chalk or crack off. * * It never separates, is always ready for use, and will not spoil when exposed to the air. * * * It can be applied by any one, whether a practical painter or not."

The Averill Chemical Paint has now been

before the public over twelve years, and in

spite of great opposition has pushed itself rap-
