

He said an Irishman offered a 20 dol bill to a Tollman on Cambridge street of the Bridge & they shot it was Epha order of they for an Irishman to have such a bill. I think the Marshall came a time of he could not having seen that bill to any one - & he said he told the Marshall that he could not remember it - & then he went off -

I left Timbotta in our the Army Bank in 20 cuts a 1/2 an hour & requested my wife to keep a close watch on the doors. When I came I told her that I thought I could get through in 10 or 15 cuts. I did not use a clevis again. I had drilled a hole through before I went up - When I went back this time I took the crow bar & knocked the wooden off our covers & a half. When I was 5 covers I had difficulty in getting my light through, the air been so hard for the hole. I carried the light before my hand through the hole. After I got it in then was no air to disturb it. I held the light out before me & the first thing I saw was the pelvis of a man; & I saw two parts of a leg. The water was then running down on a den from a sink. I then ran up & told my wife I went go down to Dr Peritoris
