

did not allow any one in the room without a permit from the Mayor, a Marshall -

The cover of the spring was $9\frac{3}{4}$ inches in diameter. - We tried to get the thorax through the hole & could not. The cover was too large enough - The pellets seemed to burst by being it up edge way.

Exp's were tried by myself & a mouse to see if noise could be heard from Dr. Williams' room to Dr. Adams. Both ways, we hallowed but could not hear. -

There was a plate with ink in it - with a stick with cotton wool - found it on ^{table} ^{bench} in private room - The stick was on the floor. I found the salivary opening open the next.

+ Green the seat of spring - opened very close up. Prothrum I & I had the exp^t of getting the thorax through the hole - the hole was then up.

We found a bag of Tan - the tax was in the Tan bag. There was about 1/2 bushel of Tan also a board. The bag of Tan lay about 8 or 10 feet from the door of L. Allen. - The bag of Tan was very near bell.

I did not see the Tan cloud on Tuesday to notice it.

The knife was sharp when I took it out of the cloud. The knife is
