

I had never seen him before you till I had
 been here since this nice command. I told
 Thompson that I thought Dr. W. appeared very
 singular, but I said I did not know but what
 it was his natural way. - I told Thompson I
 thought he (Dr. W.) trembled. I had no suspicion
 of Dr. W. - he had a quiet nervous manner. -
 It was not open about the air at Cambridge. The
 were not there over 15 or 20 sets. The Clerk, Thompson

wanted to ascertain the date of the meeting.
 Thompson was the first time since with
 College. Dr. W. said Dr. P. was the first person
 to 2. He said we lay about 4 or 5 ft. I said that
 I think to state before the witness witness - if I did
 I did not state it right. - I made a mem^o
 of the m. of the Secret then wrote at the next
 morning. - I made mem^o of the m. at Cambridge
 about found in my upper money drawer -

I think Clapham stood down by the Pump down
 when engineering was made above it Dr. W. was
 to or 12 feet from it - I noticed no fun
 in the furnace.

After the arrival I went then to the
 laboratory. The first time a Saturday. I took
 particular notice of the pond - there is a
 trench round by the wall. The tide comes
 into the trench - The tide comes we flow over
 the side of the pond side wall. - By the pump
 stands by the water for tide rises in the
 trench about two feet - The pond side
 the pump stands both ways from it
