 Post office often  
 notes to various people  
 all extra's  
 to Mr C Cunningham  
 to the Athenaeum

How did D W. fill glass  
 jars with gases, when they  
 had no bottoms -

How did D W. use the  
 two long iron cylinders in  
 his lower laboratory?

Were they ever used in his  
 lectures

Did you assist him

Was it dangerous

Was one made to revolve

Did you help him

→ Solidifying Carbonic

acid gas -

Was it hot? → exceedingly Cold
