Bridge.  
Steam Boiler Work of all kinds a specialty.  
Our Works have recently been fitted with  
new and very expensive Machinery,  
whereby a great improvement is effect-  
ed in the manufacture of Boilers,  
Tanks, &c., producing more close and  
perfect workmanship with greater  
rapidity and less cost. All plates are  
planed to the proper bevel for caulking,  
so that the objectionable practice of  
splitting the edges of plates to save the  
expense of chipping the bevel by hand  
is avoided, and less pressure is required  
in caulking to make the work tight.  
The punching is done so perfectly exact  
as not to require the use of Drift-pin  
or Reamer, consequently the seams of  
Boilers are less liable to crack by use,  
and greater safety and durability is ob-  
tained.  
Send for circular. P. O. Box 737.
