

File No. 15377

Baltimore, August 14, 1913.

S. S. Field, Esq., City Solicitor,

#217 Court House,

Baltimore, Md.

Dear Sir:

10662

The Consolidated Gas, Electric Light and Power Company has made a charge for material used in connection with the transfer of several arc lamps, which transfers were made necessary on account of street improvements and for the betterment of the street lighting service.

The material in question is the extension of cables and wire used in reaching from the old to the new lamp locations, and the Company, while charging the City for this new or additional cable and wire, together with the labor used, claims the ownership of this material.

In view of this claim, would the City be justified in paying these bills? If so, does the material become the property of the City?

Yours very truly,

(Signed) Robert J. McCuen,  
Superintendent, Lamps & Lighting.
